

JAVIER MONTAÑO

Backend & Cloud Engineer | Node.js · TypeScript · AWS / Azure

Bogotá, Colombia · (+57) 305 704 6717 · javim.montano@gmail.com · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Backend Software Engineer with 5+ years building scalable APIs in Node.js and TypeScript. Led the migration of 200,000+ production records without interrupting the business, and cut response and page load times by up to 80% on critical modules. Experienced in third-party integration (VTEX, Google Maps Platform), CI/CD with GitHub Actions and Azure DevOps, and deployment on AWS and Azure — and delivers end to end, from API to dashboard, when a project calls for it.

TECHNICAL SKILLS

Backend Node.js · TypeScript · JavaScript · Express · NestJS · REST APIs · GraphQL

Databases MongoDB · Mongoose · PostgreSQL · SQL

Cloud AWS (S3, EC2, EKS, App Runner) · Azure (App Service, Static Web Apps)

DevOps Docker · CI/CD · GitHub Actions · Azure DevOps

Practices Clean Architecture · SOLID · Automated testing (Jest)

Also works with Python · PHP (Laravel) · React · Next.js · Vite — AI tooling: GitHub Copilot · Cursor · Claude Code

LANGUAGES

Spanish: Native · **English:** B1 — Professional Working Proficiency

PROFESSIONAL EXPERIENCE

Tres Pi Medios SAS — Bogotá, Colombia

Feb 2021 – Present

Backend Software Engineer

- Led the migration of 200,000+ production records with no interruption to business continuity.
- Optimized critical core modules, cutting response and page load times by up to 80%.
- Designed and implemented scalable REST APIs in Node.js and TypeScript, applying SOLID principles and Clean Architecture.
- Integrated third-party platforms into enterprise applications, including Google Maps Platform and VTEX.
- Automated deployments with Azure DevOps and GitHub Actions pipelines, reducing release errors.
- Worked cross-functionally with frontend teams to integrate APIs into React and Next.js applications.

Technologies: Node.js, TypeScript, Express, NestJS, MongoDB, PostgreSQL, Docker, AWS, Azure, GitHub Actions, Azure DevOps

CertMind SAS & CCTI — Bogotá, Colombia

2019 – 2021

Backend Developer

- Developed and maintained academic and enterprise platforms using PHP and the Laravel framework.
- Built and integrated automated notification systems for parents and guardians.
- Created a Flutter mobile application for QR code registration and event tracking.

Technologies: PHP, Laravel, MySQL, Flutter

FEATURED PROJECTS

Organization Manager

Stanley Black & Decker, via Tres Pi Medios

Enterprise backend in Node.js integrating Google Maps Platform and VTEX. Handled mass data migrations, structured with Clean Architecture for large-scale operations.

JA Manager — Youth Platform

jovenesmodelia.com · Personal project, in production

Full-stack platform with QR check-in, gamification, attendance tracking and a statistics dashboard. Node.js + TypeScript + MongoDB API, React + Vite frontend, Dockerized and released via CI/CD to Render and Azure.

EDUCATION & CERTIFICATIONS

Universidad Cooperativa de Colombia — Systems Engineer

2021

Certifications: Clean Architecture — Platzi (2026) · DevOps — Udemy (2025) · Django with Python — Platzi (2025) · Advanced TypeScript — Platzi · Node.js REST APIs — Platzi
